

GET INVOLVED WITH PROJECT MATH MINDS

The Actuarial Foundation has joined with Mu Alpha Theta, the National High School and Two-Year College Mathematics Honor Society, to implement Project Math Minds, a new actuarial-related project that will be designed for high school students to work on during the school year. Students will compete for college scholarship money provided by The Actuarial Foundation. Winners will present their results at the Mu Alpha Theta National Convention to other members of the Honor Society.

PROJECT DETAILS

Last year, students were asked to use 20 years of data to calculate the best states to open an insurance business that would yield at least an 8 percent underwriting profit. A \$5000 scholarship was awarded!

This year, we are looking for actuaries to help develop a project for students on **natural disasters**.

We would also like to offer a second project this year, so if you have an idea, please let us know!

VOLUNTEER OPPORTUNITIES

The [Project Development Team](#) will develop this year's project and the necessary rubrics for judging the final projects of students who participate in Project Math Minds.

The [Mentoring Team](#) (a.k.a. Cranium Coaches) will be available to help address questions/concerns that students may have while working on their projects.

The [Evaluation/Scholarship Team](#) will review projects and decide who will receive a scholarship.

. ***We are looking for all levels of experience (Fellow, Associates, Candidates with actuarial work experience) to serve on these Teams!*

HOW DO I SIGN UP?

If you are interested in speaking with someone about these exciting volunteer opportunities, please contact Debbie McCormac at asa@actfnd.org or at 847.706.3600.
